

Magnets can rip holes in your child's gut

Magnets can be great fun.
But it's really dangerous
if a child swallows them.

They can attract to each
other inside the body, cut
off the blood supply and
tear holes in the gut.

A child may need major surgery
to remove them. So, keep them
away from young children. And
teach older children the risks.

If you suspect a child has swallowed
magnets, get medical help straight away.
