

A Heimishe Guide to Immunisation

I'm Chaya, and I'm here to discuss your questions about childhood immunisations and the NHS vaccine schedule.

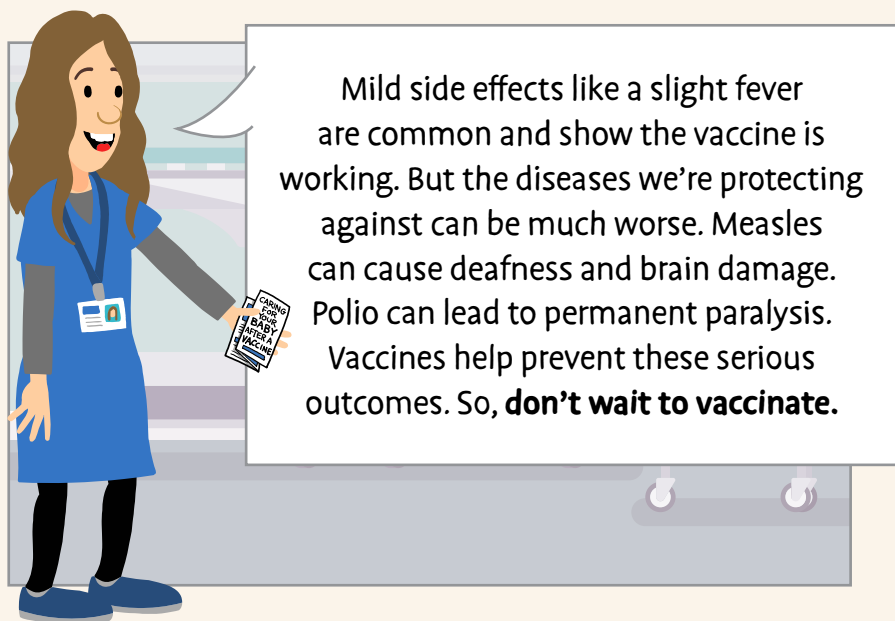

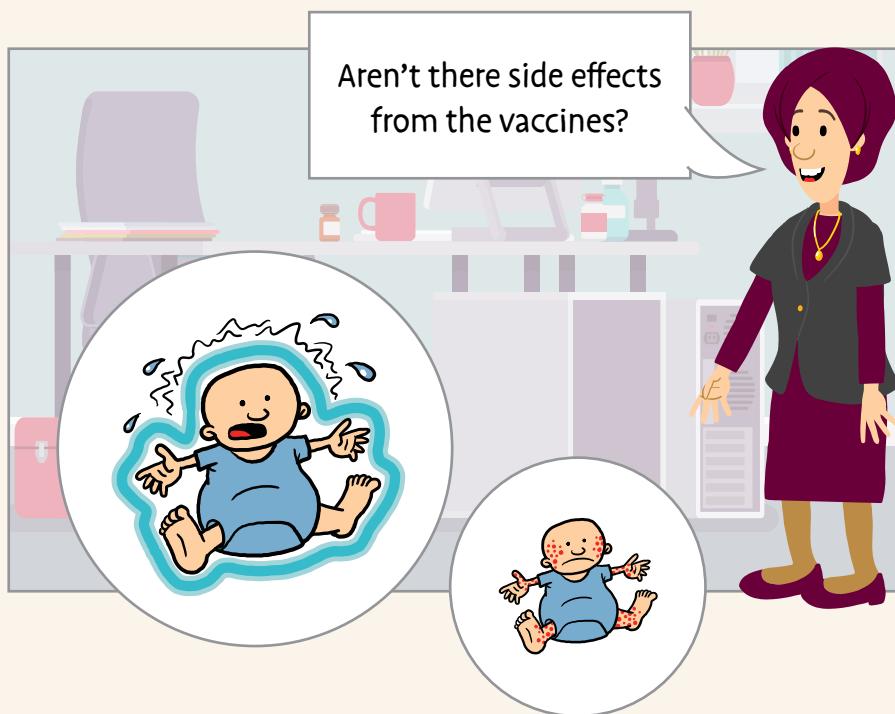

Is it not better
to give just one
vaccine today?

כל ישראל ערבים זה לזה

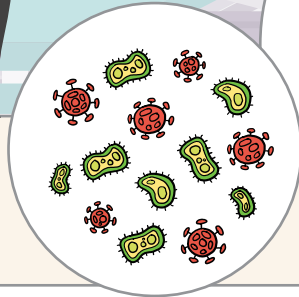

The NHS schedule protects against several serious diseases. Spacing out vaccines leaves your child vulnerable for longer. This will also put other people in the community at risk, such as women who are expecting and older people. Giving all recommended vaccines is safe and helps you stay on track. So **don't wait to vaccinate**.

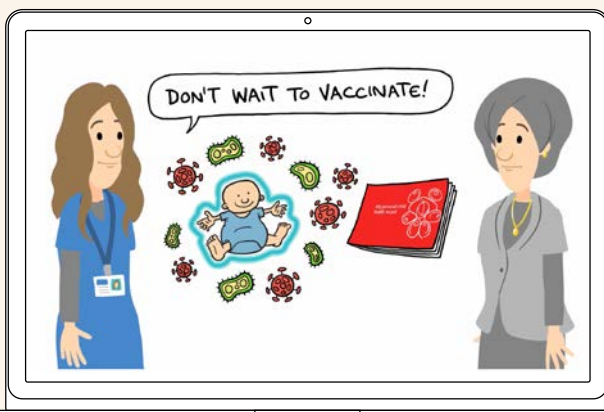

What if I'm still unsure or have more questions?

Your surgery team and health visitors are always there to support you. It's normal to have questions – and we're here to help you feel confident. Immunisation is the best way to protect your child and your community. So **don't wait to vaccinate.**

DON'T WAIT TO VACCINATE!

This booklet goes alongside a short video that answers common questions about childhood vaccines.
