Safer sleep for babies

Things You Can Do:

Always place your baby on their back to sleep

Breastfeed your baby, if you can

Keep your baby smoke free during pregnancy and after birth

Place your baby to sleep in a separate cot or Moses basket in the same room as you for the first 6 months

Use a firm, flat, waterproof mattress in good condition

Things To Avoid:

Never sleep on a sofa or in an armchair with your baby

Don't sleep in the same bed as your baby if you smoke, drink or take drugs or if your baby was born prematurely or was of low birth weight

Avoid letting your baby get too hot

Don't cover your baby's face or head while sleeping or use loose bedding

You should follow the advice for all naps, not just for night time sleep

Sudden Infant Death Syndrome (SIDS) is the sudden and unexpected death of a baby for no obvious reason and although we don't yet know how to completely prevent SIDS, it is possible to significantly lower the chances of it happening by following the advice.

You can also talk to your midwife or health visitor if you have any questions or concerns, or get in touch with us
